SUMMARY

Associate Director at MUFG Capital Analytics with 10+ years spanning public equity risk and private markets. Specialist in private equity cash flow projection and LLM-powered analytics - builds AI-powered PE portfolio monitoring platforms, firm-wide reporting systems, and performance attribution frameworks that turn complex financial data into defensible decisions. CFA, FRM, and CQF charterholder.

EXPERIENCE

MUFG Capital Analytics, Dallas, TX

07/2025 - Present

Associate Director - Quantitative Analyst & Strategist

- Designed and developed an AI-powered PE portfolio monitoring platform built on a unified data model powered by Snowflake, serving private equity funds with \$4,000B+ in aggregate NAV; internally powers the firm's profitability analysis and reporting, externally delivers client-level portfolio monitoring, cash flow projection, and commitment pacing to LPs.
- Engineered the platform with Large Language Models, Retrieval-Augmented Generation (RAG), and agent skills, enabling natural-language queries that auto-generate charts and analytical conclusions grounded in source data with no data hallucination.
- Designed and developed an end-to-end fund allocation reporting system used firm-wide by fund accountants, fund controllers, and directors, eliminating manual input errors and compressing a one-week reporting cycle to a few minutes.
- Developed PE portfolio performance contribution and attribution analysis linking portfolio outcomes to underlying fund and company-level drivers.

The Beneficient Company Group, L.P., Dallas, TX

12/2021 - 07/2025

Analyst/Associate, Portfolio Construction & Risk

- Developed and improved python-based ValueAlt (valuation) quantitative models for all private assets, incorporating data-driven quant research to refine assumptions.
- Developed the CECL calculation methodology for private assets.
- Designed, built, and owned the private assets cash flow projection model - Monte Carlo simulation with every parameter independently modeled via quantitative and ML methods.
- Implemented the data-driven ESG rating framework and analysis for Ben Private Equity portfolio.
- Conducted comprehensive quarterly position and risk analysis, including scenario and stress testing, for the Ben Portfolio.

Invesco Ltd., Houston, TX & Atlanta, GA

05/2016 - 12/2021

Portfolio Risk Analyst (Equity Risk Intern: 05/2016 - 05/2017, Analyst: 06/2017 - 12/2021)

Reports and Analyses

- Maintained and enhanced the equity risk team quarterly report production, such as CIO reports and risk snapshot reports.
- Developed data-driven quantitative risk factor research and assisted senior analysts in fund review and risk oversight.
- Performed fund performance/risk attribution and quantitative risk analyses for multiple investment teams.
- Designed customized portfolio and risk packet for Invesco Canada and led the automation project.
- Assisted senior analysts in setting risk limits for equity funds.

Researches and Technologies

- Designed and coded statistical analyses where necessary to facilitate portfolio risk analyses through R and Python.
- Conducted quantitative research along with multiple machine learning algorithms for scenario testing and market grouping.
- Performed portfolio optimizations that match demands such as regulations, active risk, and active exposures.
- Developed a deep understanding of risk models including Barra, Northfield, and Axioma.

PROJECTS / ACCOMPLISHMENTS

Deal Pricing Model Development and Enhancement, Beneficient

- Transferred original Excel-based model to Python, introducing flexibility modifications and performance optimizations; reevaluated and refined model assumptions using private funds data; devised a methodology to seamlessly integrate underwriting team's findings into the model.

PE Portfolio Monitoring Platform, MUFG Capital Analytics

- Designed and developed the firm's AI-powered PE portfolio monitoring platform covering profitability analysis, LP portfolio monitoring, cash flow projection, and commitment pacing, with LLM and RAG auto-generating charts and conclusions without data hallucination.

EDUCATION

Rice University, Houston, Texas

05/2017

Master of Computational Science and Engineering, Big Data Focus

Ohio State University, Columbus, Ohio

12/2014

Bachelor of Science in Theoretical Mathematics, minor in Economics, Magna Cum Laude

COMPUTER SKILLS

- Proficient in coding languages including Python, SQL, R, MATLAB, Excel VB, and SAS.
- Proficient in LLM application development including Retrieval-Augmented Generation (RAG) pipelines, agent skills, and AI-powered analytics systems.
- Proficient in production tools including Microsoft Office Suite, FactSet, Power BI, Relational Database, and Snowflake.
